Who sends on the file they used to get this? What we really need is that file to pull our press briefing document.

Attached is a geodatabase with the Drinking water systems. A Column has been added to signify – BWN, OK, and INOP at the end called TCEQ Status.

Subject: M6H1 – Harvey Response data needed for Mapping of BWN and INOP Systems

Joe,

For Mapping of systems under a boil water notice or not operating

A simple XLS file with one column containing IDs for Drinking water systems having either a BWN or as INOP and a second column containing either BWN or INOP as appropriate

BWN would be from the last assessment record having GENLP, LP/LT, RESULTS and any system that has a BWN Start date on any assessment (field 10) with a null in all assessments. Only one record per system.

Systems ID	Status
1234567	BWN
7654321	INOP
